INDEX TO VOL. VI (B).

AUTHORS' INDEX.

Aiyar, R. Gopala	..	*See* Subramaniam and Aiyar. *See* Panikkar and Aiyar.
Akhtar, S. A.	..	Report on some nematode parasites of Kabul, with descriptions of new species, 263.
Chima, I. S.	..	*See* Luthra and Chima.
Chiplonker, G. W.	..	Echinoids from the Bagh beds, 60. *See* Nath and Chiplonker.
Dessai, Vanctexa	..	*See* Mello and others.
Fonseca, Luis da	..	*See* Mello and Fonseca.
Jacob, K.	..	On *Protocyathea rajmahalense* sp. nov., a cyatheaceous tree-fern, with notes on the geological distribution of the Cyatheaceæ, 73.
Jones, S.	..	On the origin and development of the cement glands in *Etroplus maculatus* (Bloch), 251.
Kotasthane, W. V., and Narayana, N.		The proteins of groundnut (peanut), *Arachis hypogaea*, Linn., 376.
Lal, M. B.	..	Studies on the trematode parasites of birds, Part II.—Morphology and systematic position of some new blood-flukes of the family Schistosomidæ, 274.
Luthra, J. C., and Chima, I. S.		Some studies on temperature of the cotton plant in the Punjab, 131.
Mello, I. F. de, and Fonseca, Luis da		Further notes on the Hæmoparasitology of the Indian birds, 213.
Mello, I. F. de, and Meyrelles, C. C.		On the nature and identification of some roundish bodies found either free or as endoglobular parasites in the blood of *Calotes versicolor* Daud., sub-species major Blyth, 98.
Mello, I. F. de, Dessai, Vanctexa, and Xeldencar, Vamona		On a cercomonad parasite of the intestinal tract of the pentatomid bug *Aspongopus obscurus* (Fabr.), 220.
Meyrelles, C. C.	..	*See* Mello and Meyrelles.
Mitter, J. H., and Tandon, R. N.		Fungi of Allahabad, Part III, 194.
Narayana, G. V.	..	On the nectar secretion in the coconut flowers (*Cocos nucifera*, Linn.), 224.
Narayana, N.	..	*See* Kotasthane and Narayana.
Nath, Raj, and Chiplonker, G. W.		Palæontological study of gastropods from Laki and Bagatora, Sind, 232.
Pande, B. P.	..	On some digenetic trematodes from *Rana cyanophlyctis* of Kumaon Hills, 109.

Panikkar, N. Kesava, and Aiyar, R. Gopala — The brackish-water fauna of Madras, 284.

Pithawalla, M. B. .. Climatic conditions in Sind, 19.

Randhawa, M. S. .. A note on aplanospores in a species of *Oedogonium*, 230.

Rao, A. L. Sundar .. Studies in the physical and chemical properties of some sugarcane soils, 91.

Rao, C. Bhashyakarla .. The Myxophyceæ of the United Provinces, India, III, 339.

Rao, C. R. Narayan .. On some new forms of Batrachia from S. India, 387.

Reddy, A. Ramakrishna — The physiology of digestion and absorption in the crab *Paratelphusa* (*Oziotelphusa*) *hydrodromus* (Herbst), 170.

Singh, Jagjiwan .. Studies in soil bacteria of the subtropical region—Punjab, North India, 121.

Subramaniam, M. K. — Is the chromophobic part of the Golgi apparatus and mitochondria the ergastoplasm?, 203.

Subramaniam, M. K., and Aiyar, R. Gopala — The Golgi apparatus and the vacuome in protozoa —some misconceptions and the question of terminology (a review), 1.

Tandon, R. N. .. *See* Mitter and Tandon.

Virkki, C. .. On the occurrence of winged spores in the lower Gondwana rocks of India and Australia, 428.

Xeldencar, Vamona .. *See* Mello and others.

TITLE INDEX.

Aplanospores in a species of *Oedogonium*, note (Randhawa), 230.

Aspongopus obscurus (Fabr.), pentatomid bug, on a cercomonad parasite of the intestinal tract (Mello and others), 220.

Batrachia from S. India, on some new forms (Rao), 387.

Calotes versicolor Daud. subspecies *major* Blyth, on the nature and identification of some roundish bodies found either free or as endoglobular parasites in the blood of (Mello and Meyrelles), 98.

Climatic conditions in Sind (Pithawalla), 19.

Coconut flowers (*Cocos nucifera*, Linn.), on the nectar secretion (Narayana), 224.

Cotton plant in the Punjab, some studies on temperature (Luthra and Chima), 131.

Echinoids from the Bagh beds (Chiplonker), 60.

Etroplus maculatus (Bloch), on the origin and development of the cement glands (Jones), 251.

Fauna, brackish-water, of Madras (Panikkar and Aiyar), 284.

Fungi of Allahabad, India, III (Mitter and Tandon), 194.

Gastropods from Laki and Bagatora, Sind, palæntological study (Nath and Chiplonker), 232.

Golgi appaartus and mitochondria, is the chromophobic part, the ergastoplasm? (Subramaniam), 203.

Golgi apparatus and the vacuome in protozoa—some misconceptions and the question of terminology (a review), (Subramaniam and Aiyar), 1.

Groundnut (peanut), *Arachis hypogæa*, Linn., proteins (Kotasthane and Narayana), 376.

Hæmoparasitology of the Indian birds, further notes (Mello and Fonseca), 213.

Myxophycæ of the United Provinces, India, III (Rao), 339.

Nematode parasites of Kabul, some, report, with descriptions of new species (Akhtar), 263.

Paratelphusa (*Oziotelphusa*) *hydrodromus* (Herbst.), crab, the physiology of digestion and absorption (Reddy), 170.

Protocyathea rajmahalense sp. nov. A cyatheaceous tree-fern, with notes on the geological distribution of the Cyatheaceæ (Jacob), 73.

Soil bacteria of the subtropical region—Punjab, North India, studies (Singh), 121.

Spores, winged, occurrence, in the lower Gondwana rocks of India and Australia (Virkki), 428.

Sugarcane soils, some, studies in the physical and chemical properties (Rao), 91.

Trematode parasites of birds, studies, II (Lal), 274.

Trematodes, some digenetic, from *Rana cyanophlyctis* of Kumaon Hills (Pande), 109.
